MASSACHUSETTS TRUENESS-TO-NAME
INSPECTION SERVICE

*A service to nurserymen and fruit growers to promote
trueness to name of fruit varieties.*

Sponsored by The Massachusetts Fruit Growers' Association

STATEMENT OF INSPECTION FOR
TRUENESS-TO-NAME

Amherst, Mass., July 8, 1957

To Whom It May Concern:

All salable apple, pear, plum, and one-year sweet cherry varieties propagated and now growing at Slaybaugh Brothers Nursery, Aspers, Pennsylvania, have been examined by the Massachusetts Trueness-to-Name Inspection Service. To the best of our knowledge these trees are true to name as they now stand in the nursery row.

Massachusetts Trueness-to-Name
Inspection Service

COMMONWEALTH OF PENNSYLVANIA
DEPARTMENT OF AGRICULTURE

Resident Nursery Certificate No. 359. This certificate is void after September 30, 1958, but may be revoked for cause.

This is to certify that the nursery premises of: Slaybaugh Brothers Nursery, Raymond I. Slaybaugh, Prop., R. D. No. 1, Aspers, Pennsylvania, including 13.0 acres of stock have been officially inspected and passed in accordance with the provisions of the Act of April 21, 1937, P. L. 318.

Permission is hereby granted this nurseryman to sell, deliver or transport nursery stock during the year ending September 30, 1958; provided that a tag on which an exact copy of this certificate is printed must be attached to each package, box, bale, truckload or carload lot of nursery stock sold or delivered.

This Certificate does not cover the requirements of any special quarantine or regulation promulgated by the Commonwealth or by the United States Department of Agriculture. Furthermore, this certificate does not apply to trees obtained from the Commonwealth of Pennsylvania or uninspected nursery stock from any source.

A separate certificate for the grower of strawberry and bramble plants is required.

Issued at the State Capitol, Harrisburg, Pa., September 16, 1957.

DEPARTMENT OF AGRICULTURE

T. L. GUYTON,
Director, Bureau of Plant Industry.

NUMBER OF PLANTS OR TREES FOR AN ACRE

To figure the number of plants for an acre at any given distance, multiply the distance between rows by the distance between plants, which will give the number of square feet allowed to each plant, and divide the number of square feet in an acre (43,560) by this number. The quotient will be the number of plants or trees required.

SLAYBAUGH BROS. NURSERY

Aspers, R. D. 1, Pa.

Dear Fruit Grower:

Each year we attempt to give you an accurate appraisal of the quality of our Fruit Trees and the prospective demand for them.

We are pleased to inform you that our trees have made an excellent growth with the aid of our "Sprinkler Irrigation System." They are strong and healthy and therefore they should do well for you.

The demand for our trees is greater than normal at this date and there are very definite indications that our supply will not be sufficient to meet the demand. Therefore, if you are figuring on planting this fall or next spring and desire to purchase from us, we urge you to place your order at your earliest convenience.

Most of our business has developed through our customers, who have recommended us to their friends, who know what it means in extra benefits to plant Slaybaugh Bros. quality trees of superior strains.

If you desire to check into our reliability, we refer you to The Biglerville National Bank, Biglerville, Pa., and to Dr. John U. Ruef, of Pennsylvania State University, State College, Pa. If you wish to talk with customers in your area, we will be pleased to forward their names.

We guarantee our trees to be True-to-Name, guarantee them to be free of disease, and in a good live condition when they leave the nursery since they are freshly dug for each order.

We cordially invite you to visit our nursery in order that you may see the quality of our large trees as they stand in the nursery rows. If you cannot come to the nursery, visit us at the Pennsylvania Farm Show, January 13 to 17, 1958 (Booth No. 698).

Respectfully yours,
Slaybaugh Bros. Nursery.
